## Heads Up Activity – Flight Distances Worksheet

### Directions

Fly your airplanes three times each, and record the distance of each flight to the nearest foot as well as the amount of time it stayed in the air. Take your three measurements, add them together, and divide by three to get your average flight length.

### First Plane Design

Flight #	Length in feet	Time in seconds
1		
2		
3		
Average		

### Second Plane Design

Flight #	Length in feet	Time in seconds
1		
2		
3		
Average
